Gerald:

Per the agenda, I will have almost nothing to say about the Private Demonstration next week. Most of that work is being done by Abt, and I am focused almost exclusively on finishing the public side. Perhaps Tina could say a word or two about the private side, as she is the main coordinator for that at this point. I fully expect to dive in as a coordinator on the private side as soon as I am done with the public demonstration. The private demonstration is really still in the beginning stages as we work out what to do.

Subject: Revised Agenda for Review

Attached is the draft that I meant to have you review rather than the previous one that I emailed you this morning.

Sorry for my confusion.

Thanks.
Gerald
